

Date: \_\_\_\_\_

Dear Family,

Right now I am on a field trip to the *Kindertown* TIME Zone exhibit. I am currently visiting the Post Office Station. In this station we are learning about the postal system, and one of the activities we are doing is estimating how long a letter will take to go through the postal system in Lake Forest. I guessed it would take \_\_\_\_\_ days for this letter to get to our house from *Kindertown*. When we receive this letter at home, please help me figure out how many days it really took. I need to write that number on the line below and bring it to class. We will graph our results and compare the actual time it took to the amount of time we guessed when we were in TIME Zone. Thank you for your help!

Love,

\_\_\_\_\_
