

Dear \_\_\_\_\_,

I have decorated an "Illinois Adventure" t-shirt with state symbol stamps as part of our fourth grade TIME Zone Program on Illinois.

The fabric ink used for the stamping will set in 24 hours. It should not be washed before that time. It can be further heat set, which will increase the color fastness and color intensity (but is not required) by putting the t-shirt alone in a dryer on a HIGH/COTTON setting for 20 minutes or by ironing it from the reverse side (lightly on HIGH - do not use steam) onto a paper towel.

The t-shirt should be laundered in cool water with a mild detergent (wash it alone the first time). Do not use bleach or detergent containing bleach on the t-shirts.

Love,

---
